

Recognise and fund excellent research wherever it is found and address regional imbalances in R&D funding.

Support a diverse, healthy and sustainable post-18 sector; recognising universities as key partners along with business in tackling the causes and effects of climate change and providing the future workforce needed for the green economy.

Ensure the government's skills and innovation agendas are working hand in glove to equip businesses with the talent and technologies they need to help the UK realise a net zero future.

Scale up investment to stimulate greater regional university-business partnerships so universities can better support businesses to adapt and develop green products and processes.

Policies to Power Action on Climate Change
